DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a method of identifying agents that regulate the transcriptional activating activity of human AR and SLIM3, classified in class 435, subclass 7.8.
- II. Claims 1-9, drawn to a method of identifying agents that regulate the transcriptional activating activity of human ER β and SLIM3, classified in class 435, subclass 7.8.
- III. Claims 10-12, drawn to drawn to a method of identifying agents that regulate the binding between SLIM3 and human AR, classified in class 435, subclass 7.2.
- IV. Claims 10-12, drawn to drawn to a method of identifying agents that regulate the binding between SLIM3 and human ER β , classified in class 435, subclass 7.2.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and IV are independent and distinct, each from the other, because the methods are practiced with materially different starting materials, have materially different process steps, and are for materially different purposes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1646

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
